Two Amazing Exhibits to Run Concurrently at TAACCL

TAACCL celebrates the life and work of Richard W. Wood along with the work of local photographers in a "double-feature" event to open this week.

Richard W. Wood was quite well-known in Houston for his astounding large urban landscapes that resembled giant photographs but were actually oil paintings. His ability to paint in such an abstract, yet totally realistic style was unique and awe-inspiring. His death last year was felt deeply by the art community in both Houston and New York.

What: The Richard W. Wood Memorial Tribute Exhibition

When: Opens Thursday, Feb. 11 and runs through Thursday, March 18.

FotoFest Show: "Fresh from the Bay: Recent Works by Photographers from Bay Area Houston" will run concurrently with the Richard W. Wood Memorial Tribute Exhibition. This

invitational exhibit features the varied and unique works of local photographers.

When: Opens Thursday, Feb. 11 and runs through Wednesday, April 7.

Artists and members preview: Thursday, Feb. 11 from 5:30 p.m.-6:30.p.m. Artists present "Gallery Talk" at 5:30 p.m.

Music by Arcadia Trio. Refreshments will be served.
